SUMMARY

Full-Stack Developer with 2+ years of experience in React.js, TypeScript, Node.js/NestJS and PostgreSQL, building and shipping YUKO — a production customer retention SaaS platform for Shopify & WooCommerce merchants.

CORE TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, Context API, Zustand, HTML5, CSS3, SCSS, Tailwind, React Flow, TanStack Query, Zod, Polaris, shadcn/ui, Liquid

Backend: Node.js, Express.js, NestJS, REST APIs, GraphQL

Databases & ORMs: PostgreSQL, MySQL, MongoDB, Prisma, NeonDB

Architecture & Design: Frontend System Design, Component Architecture, State Management (Context API, Zustand)

DevOps & Tools: Git/GitHub, Docker, Linux, Postman, Insomnia, Cloudflare, AWS

EXPERIENCE

Software Developer [Fullstack]

07/2024 - Present (2 Years)

Cartrabbit - Humble Tree

Coimbatore, India

Domain: eCommerce SaaS

- Architected and shipped YUKO, a customer retention SaaS platform for Shopify and WooCommerce merchants, covering Reviews, Loyalty, Referrals, and Membership modules — within 12 months.
- Owned and engineered ~70% of the frontend architecture using React.js and TypeScript, delivering merchant dashboards for Reviews, Loyalty, Referrals, and Membership modules.
- Built a visual workflow automation builder (Zapier/n8n-style interface) using React Flow, used by 50+ merchants and supporting 8+ configurable nodes for referral, review, and loyalty automation through drag-and-drop workflows.
- Designed and implemented the complete backend for the Referral module, contributing ~40% of the platform's backend, using Node.js, Express.js, and PostgreSQL (Prisma ORM), and implementing business logic and API integrations.
- Planned and integrated REST APIs for merchant-facing features, enhanced UI performance, improving dashboard load time by ~25% and reducing onboarding friction by ~35%
- Collaborated cross-functionally in an Agile environment with product managers, designers, and backend engineers to gather requirements and deliver 10+ feature enhancements that improved merchant experience and usability.

Frontend Developer Intern

08/2023 - 10/2023

Mallow Technologies

Karur, India

- Built responsive, user-focused web pages with HTML, CSS, JavaScript, and React.js, resulting in a 30% increase in user engagement.
- Achieved a 95% on-time completion rate in an Agile environment.

PROJECTS

WORKFLOW AUTOMATION BUILDER

GitHub: github.com/swami1302/workflow_automation | Live: workflow-automation-swart.vercel.app/

- Built a low-code visual workflow automation platform (similar to n8n/Zapier) with a drag-and-drop canvas using @xyflow/react, enabling users to model multi-step business logic without writing code
- Created 6 specialized node types (Trigger, HTTP, Binary, Delay, Log, Exit) each with Zod-validated schemas and react-hook-form for type-safe configuration
- Developed a NestJS REST API with JWT authentication and Prisma ORM for persisting workflow graph state (nodes, edges, configurations) to PostgreSQL
- Architected the backend to support a future BullMQ execution engine — node types like Delay and Trigger are designed with job-queue execution in mind

EDUCATION

B.Tech Information Technology

10/2020 - 06/2024

Bannari Amman Institute of Technology, Sathy

CGPA: 8.67/10

ACHIEVEMENTS & COMMUNITY

- Conducted guest lectures on Full Stack Development across schools and colleges in Tamil Nadu, independently training 150+ students on React.js, Node.js, and modern web development and AI practices
